EXPERIENCE

SOFTWARE ENGINEER INTERN (*Auckland, November 2023 – February 2024*)

Eroad Ltd.

- Created a deployment guide for Eroad's new V2 deployment method, improving V2 deployment experience for at least 40% of Eroad developers who have yet to use V2.
- Took ownership of legacy code and individually investigated critical issues and design flaws which caused it to restart every 15 minutes.
- Created new mailing microservice for the CVIU (Civil Vehicle Inspection Unit), implementing 6 different AWS cloud services using Terraform for the microservice architecture.

PROJECTS

Suika Game Replica | *Next.js, TypeScript, Matter.js, Tailwind CSS, Firebase* [Deployed Application](#)

- Individually developed a replica of the Suika game, iteratively improving through testing with various stakeholders.
- Utilized agile methodologies to efficiently develop the project.
- Integrated Firebase to store leaderboard data.

XV (Medieval X/Twitter Clone) | *React, Firebase, Tailwind CSS* [Deployed Application](#)

- Developed a medieval themed Twitter in a team of 5 at the SESA x WDCC 2023 Hackathon.
- Created a full stack social media web app with real-time updating feed, character limitations, friending system, leaderboard functionality within 48 hours.
- Text, image, gif upload, landing page, login/sign up utilizing Firebase authentication.

KNEKT (Calendar Web Application) | *HTML, CSS, JavaScript, Firebase* [Github Repository](#)

- Developed a Calendar Web application for meetings in a team of 6 at the DEVS 2023 Hackathon.
- Created a full stack Calendar application with friending system, local suggestions for restaurants, entertainment etc, weather warnings, events log on creating a meeting.
- Login/sign up utilizing Firebase authentication, interactive Calendar, weather API, google API.

Match Making System | *Flutter, Firebase* [Github Repository](#)

- Individually developed a Badminton Doubles Match Making System using Flutter for Badminton North Harbour. Iteratively improving through testing with stakeholders.
- Created web application with ability to add, remove, edit players from a player database which are stored in a local excel file, create matches based on number of courts, time and players available.

EDUCATION

University of Auckland (2022 - 2024)

Bachelor of Science in Computer Science

- Science GPA: 8.5 / 9.0 (A/A+)
- Certificate of Outstanding Achievement in COMPSCI 210, 230 and 367 – Top 5% of Course

TECHNICAL SKILLS

- Git, GitHub, Python, Java, Spring, Spring boot, Junit, Mockito, Flutter, React, Next.js, TypeScript, Matter.js, Tailwind CSS, Firebase, Docker, GitHub Actions, Kubernetes, Terraform, AWS cloud services (EC2, SES, S3, SNS, SQS, IAM, ECR, EKS), Datadog, K8 pod logs, SLF4J logging.
- Visual Studio Code, IntelliJ, Maven, DBeaver.
